

# PPB

## Leonard Personnel Protective Barriers

With the Leonard Personnel Protective Barrier system you can provide a greater level of protection in any production setting!

# LEONARD AUTOMATICS, INC.

*"our reputation is stainless"®*

# When “Social Distancing” is not achievable the PPB system creates a barrier between operators.

- Simple bolt together system
- Expandable
- Floor or ceiling supported
- Floor support system includes caster wheels for ease of movement
- Creates a personal protective barrier between operators
- Can be used in a variety of applications
- Rigid steel frame
- Powder coated finish

We believe the PPB barrier system creates another layer of protection for the operators where traditional PPE\* may not be available or restrictive in function. This allows you to add another layer of protection with physical barriers. The barrier has the potential to block the transmission of contaminants. Used properly and with other infection control practices such as hand-washing, using alcohol-based hand sanitizers, and covering coughs and sneezes, these barriers can minimize the spread.

\*Personal protective equipment (PPE) refers to protective clothing, helmets, gloves, face shields, goggles, facemasks and/or respirators or other equipment designed to protect the wearer from injury or the spread of infection or illness.

*\*Please consult layout drawings for detailed dimensions including conveyor, control panels and utility connections.  
Specifications subject to change without notice.  
Manufactured in the U.S.A.
